EXPERIENCE

Fullstack Developer, Intern

Hellenic Parliament

📅 July 2019 – October 2019   📍 Athens, Greece

- Designed & developed from scratch a fully-functioning inventory-managing web application.
- Automated the process of election statistics extraction from Excel input files & the presentation of the results.

Software Engineer, Intern

NIKE Inc.

📅 August 2020 – October 2021   📍 Hilversum, The Netherlands

- **Side Project**: Automatically generate video subtitles using Amazon Transcribe
- **Globalization team**(localization of Nike content): Directly contribute to the UI and Microservices of the platform built by the team

PROJECTS

k31- Compilers

📅 May 2019

- **Description**
  The whole process of building a compiler, from creating an internal AST representation of the program to Intermediate Code generation this is a three part project developed for course k31-compilers of di.uoa in Spring 2019. I think that the 3rd part, building a mini-java compiler using Java is really something to take pride in.
- **Techs & Languages**
  Java, bash, LLVM, JFlex, JavaCUP, JTB, VisitorPattern, JavaCC, Git, Markdown

Linux Programming

📅 March 2019 – July 2019

- **Description**
  A three-part series of C applications, using the Linux API.
- **Techs & Languages**
  C, Bash, Linux API, Git, LaTeX, Markdown
